

We probably all recognize some of the feelings described here and feel stressed or anxious from time to time. The first important step in tackling stress or anxiety is realizing that it is causing you a problem.

## *Who Will Help Us?*

About Ted Matthews, M.S.

Ted has worked with rural issues in counseling for over 20 years. He has been director of mental health services during two natural disasters in the 1990s. Ted also has extensive counseling experiences in the areas of crisis intervention, family issues, suicidology and domestic abuse.

# Mental Health Outreach Program

## ***WHAT IS IT?***

The Mental Health Outreach Program through the Southern Minnesota Center of Agriculture is a multi-faceted approach to addressing the importance of mental health in helping farm families achieve their business and family goals.

The Mental Health Outreach Program recognizes that mental health issues often affect personal well being and the health of farm businesses, Farm Business Management Instructors, farm service providers, and their respective families. All sorts of situations cause stress and anxiety. The object of the Mental Health Outreach Program is to create an appropriate help network by reducing the overall stress and anxiety on the farms.

The Mental Health Outreach Program compliments the array of services already available to farmers and farm families through the Farm Business Management program.

## ***WHY DO WE NEED THE PROGRAM?***

As farmers, we are known for our work ethic and strong sense of pride. While these traits can be virtues, there is a downside in that they can cloud perceptions and lead to a denial of problematic situations:

- Concern about weather
- Uncertainty over markets and their trends
- Working with other farmers for more profitability
- Frustration with agencies and bureaucratic hassles
- Stress from seeking financial assistance
- Fear of losing the family farm
- Feelings of dread or hopelessness
- Serious problems such as depression, suicide, or domestic abuse

Promoting broader team approaches to managing stress sources in farming will increasingly spell the difference between a failed farming operation and a successful one.

## **CRISIS OUTREACH PROGRAM ADDRESSES:**

- Problems: emotional loss, frustration, domestic violence, sexual assault, suicide, etc.
- Relationship changes: increased tension, marital and family problems
- Work Disruption: lost jobs or hours, work demands and schedule changes, etc.
